

OliNet

OliNet is a harvesting aid for Olives, nuts, seed and fruit collection. It has folding arms with an automatic trunk & overlapping seal, resulting in fast and reliable setup. Olives or nuts are collected in the suspended net and then funneled into storage tubs.

- Very fast, only takes 20 seconds set up with one operator
- Detachable elastic rope sides allow easy access to centre of tree
- Net automatically seals around tree trunk and over-lapping join
- Fruit stored in easy to handle and accessible tubs
- No contamination from soil or animal droppings
- Easy fast leveling, height adjustment
- Easy to manoeuvre from tree to tree with good visibility for repositioning
- Steering wheel has auto parking brake
- Easy to attach to a 4 wheel ATV
- Extension arms can be changed to fit larger nets
- Minimal bruising of fruit
- Different sizes available 4m, 5.5m & 7m
- Easy dismantling for compact long distance transport

Fruit stored in easy to handle and accessible tubs

Three plastic tubs provide ample storage of fruit and are easy to access.

Rubber padding on the trunk guides & arm base provide easy alignment & protection to the trunk

Net automatically seals around tree trunk and overlapping joint

Automatically sealing the trunk with an over-lapping elastic joint to prevent any loss of fruit when the arms are locked into position. The new style OliNet can seal around 60cm diameter trunks.

Sizes available 4m, 5.5m & 7m

The arms and steering wheel are double telescopic and adjusted to suit net size.

The advantage of this is that the same OliNet frame can be used and extended as trees grow, just purchase the next size net.

Easy to manoeuvre from tree to tree with good visibility for repositioning

OliNet has excellent visibility when positioning against the trunk and is easy to manoeuvre in this compact form. The OliNet is easy to transport throughout the grove and is fitted with 15" tyres with greased bearings.

For long distance transport, The OliNet can be made even more compact by - retracting telescopic arms, unbolting tub rack & third wheel assembly and then can be lifted by two people and put into a utility.

Detachable elastic rope sides allow easy access to centre of tree

The net is suspended with elastic rope and to reach in just push against net edge. Or the elastic rope can also be unhooked from any arm or arms at any time to allow full access to all parts of the tree without loss of fruit

Easy leveling, height adjustment

This 15" steering wheel with auto park brake and fast height adjustment is standard on the OliNet. This wheel can be removed if mounting to a 4 wheel ATV, but still keeping the easy height adjustment.
